DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 6, 9 and 13-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 7,071,289 (Sotzing) as per reasons of record.

Response to Arguments

3. Applicant's arguments and amendments filed June 17, 2008 have been fully reconsidered but are not found persuasive.

Sotzing discloses aqueous dispersions of thieno[3,4-B]thiophene polymer (meeting applicant's conductive polymer) which furthermore comprise a polyanion, such as Nafion (meeting applicant's colloid-forming polymeric acid). See example 2, claims 13, 26, etc. Moreover, patentee's compositions may be doped with conventional p-dopants, e.g., non-polymeric organic acidic compounds (meeting applicant's dopant). Accordingly, it is maintained it is within the scope of patentee's invention to formulate aqueous dispersions comprising a thieno[3,4-B]thiophene polymer (reading on presently claimed conductive polymer) and Nafion (reading on presently claimed colloid-forming polymeric acid), wherein the thieno[3,4-B]thiophene polymer is doped with a non-polymeric organic acidic dopant (reading on presently claimed dopant) with the reasonable expectation of success. It is maintained that the presently

claimed subject matter constitutes an obvious embodiment of the reference disclosure to one having ordinary skill in the art.

Allowable Subject Matter

4. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The Sotzing disclosure of record does not anticipate or fairly suggest the use of polyaniline.

The previous allowability indication of claim 16 is rescinded in light of the new ground of rejection set forth hereinabove.
